O EN LOS CIMIENTOS PERTENECIENDO AL CLIENTE

The diagram illustrates the ownership and installation of gas lines for a residential property. It shows a house labeled 'RESIDENCIA' situated on a lot with a 'CALLE' (street) to the right. A 'ZONA DEL PATIO TRASERO' (backyard area) is also indicated. The diagram features several types of lines: a green dashed line representing 'LÍNEA PRINCIPAL DE SWG' (main SWG line) running along the property boundary; a red dashed line representing 'LÍNEAS SUBTERRÁNEAS EN PATIOS PERTENECIENDO AL CLIENTE' (underground lines in the yard belonging to the client), which includes a 'MEDIDOR DE GAS (SWG)' (gas meter) and a 'SERVICIO DE SWG' (SWG service) connection; and a cyan dashed line representing 'LÍNEA DOMICILIARIA' (residential line) that runs from the yard into the house. A yellow highlight is placed on the red dashed line. The diagram also shows 'PASILLOS/SERVIDUMBRES DE PASO' (easements) and a 'LÍNEA SECUNDARIA' (secondary line) for outdoor appliances like grills and pool heaters.
