*2021 American Gas Association; emissions from space heating, water heating, cooking and clothes drying

SMELL NATURAL GAS? STOP. LEAVE. CALL.

In its untouched state, natural gas is odorless. Southwest Gas adds mercaptan to make natural gas easier to detect, which emits an odor similar to sulfur or rotten eggs.

If you smell natural gas, stop and leave the area immediately. From a safe location, call **911** and Southwest Gas at **877-860-6020**, day or night.
