

SAFETY FIRST: SOUTHWEST GAS' COMMITMENT TO EXCELLENCE

At Southwest Gas, safety is our highest priority. Your choices affect pipeline safety. By working together, we can reduce risks to people, communities, and the environment.

PROTECTING COMMUNITIES

We're committed to keeping our communities around pipelines safe.

Safe Construction Practices

Building pipelines with the highest safety standards.

Ongoing Improvement Projects

Continually upgrading our infrastructure for better or safer performance.

Regular Inspections & Maintenance

Keeping our pipelines in top condition with routine checks, always meeting or exceeding federal requirements.

Lab Testing for Longevity

Testing pipeline materials to ensure they meet high quality standards and analyzing any defects identified.

more.

RELIABILITY ASSURANCE PROGRAMS

We are committed to ensuring our natural gas pipelines are safe and reliable.

Training and Education

Training sessions are provided to personnel, contractors, excavators and plumbers, to educate the public on natural gas safety.

Leak Detection and Repairs

Regular inspections identify pipeline leaks, which are promptly repaired, along with the replacement of aging sections.

Pressure Testing and Analysis

Pipeline pressure undergoes testing, and failed components are analyzed to enhance system performance.

Emergency Preparedness

Drills are conducted to maintain readiness for swift response in case of an emergency.

EMERGENCY RESPONSE

At Southwest Gas, we're committed to protecting our natural gas infrastructure, including natural disasters like floods, wildfires, and earthquakes.

Quick Response

Companywide our crews respond to incidents on average in **under 23 minutes.**

Clear Communication

We keep you informed with updates throughout an event, ensuring you know what's happening and how to stay safe.

Meter Safety

When needed, gas meters are turned off for customer safety.
Never try to turn the meter off or on yourself.

If you suspect a natural gas leak, leave the area immediately and, from a safe place, call 911 and Southwest Gas at 877-860-6020.
