Find energy-saving tips, safety information, energy efficiency rebates, employment opportunities and more.

DISCOVER HIDDEN SAVINGS

Your home may be hiding energy savings in places you didn't even know! Explore our Energy Savings Portal at swg.opower.com to find out how natural gas is being used in your home.

UNDERGROUND PIPELINES CAN BE LOCATED ANYWHERE

Out of sight shouldn't mean out of mind. Natural gas lines can be buried anywhere. If you suspect a gas leak, leave the building or area immediately and call **911** and Southwest Gas at **877-860-6020**.

Learn how to recognize a gas leak at swgas.com/safety.

GET READY FOR HEATING SEASON

Natural gas space heating keeps you warm and comfortable – and a properly maintained heating system provides many years of reliable and efficient operation.

Visit swgas.com/rebates to find out about a seasonal home heating inspection offer, available in most areas. Prepare for heating season by having your furnace serviced by a licensed contractor.

COMMITMENT TO SAFETY

At Southwest Gas, safety is our top priority. We work year-round to protect our communities by regularly inspecting pipelines, following strict construction standards, upgrading infrastructure, and testing materials for long-term reliability.

We also take emergency preparedness seriously, conducting regular drills to ensure we're ready to respond quickly and effectively to emergency calls, including natural disasters such as floods, wildfires, and earthquakes. During these events, we provide real-time updates to help you stay informed and safe—so be sure you're signed up for email and text alerts through your Southwest Gas MyAccount.

Learn more about our commitment to pipeline safety at swgas.com/safety.
